

JUMBO DISPLAY COUNTDOWN TIMER

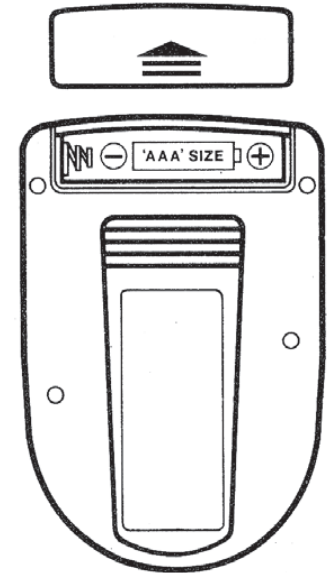

OPERATING INSTRUCTIONS

TI267

OPERATING INSTRUCTIONS

1. Turn the timer over and open the battery compartment on the back by sliding its cover up.
2. Install the supplied “AAA” battery in the compartment, observing the polarity markings inside. A correct installation will produce four quick beeps.
3. Replace the cover, turn the timer over, and remove and discard the protective plastic film with the black “19:59” overlay.
4. Set the desired countdown time by repeatedly pressing the **HR** and **MIN** buttons on the front panel until the time shows on the LCD. The maximum countdown duration is 19 hours, 59 seconds.
5. Press the **START/STOP** button to begin the countdown. The timer will produce one beep, and the colon separating the hours and minutes fields on the LCD will begin blinking once per second.
6. When the countdown completes (with the display showing **0:00**), the alarm will sound. **To silence the alarm**, press the **MIN** button (which has the words **ALARM STOP** in red below it). The timer will return to idle mode, with the colon steady (not blinking).
7. To pause an ongoing countdown, press the **START/STOP** button. The colon will stop flashing. **To resume a paused countdown**, press the **START/STOP** button again. The colon will resume blinking.
8. To enter a new countdown duration, first clear the display by pressing the **HR** button (which has the word **CLEAR** in red below it). Then enter the new duration by pressing the **HR** and **MIN** buttons.

SPECIFICATIONS

Display Size: 1.8 x 0.75 in. (46 x 19mm)

Digit Height: 0.75 in. (19mm)
